Dear Josh,

I'm seen several hints lately that you've been writing about the threats to medical research from misguided, enthusiastic overregulation. Is that true? If so I would be grateful if you could send me reprints of your writings in this field. I am trying to write a book which I hope will contain a chapter on the current state of medical research.

It would be nice to see you again. I'm scheduled to be at a meeting on your campus on November 15. Would you be free for lunch that day?

I hope this note finds you in good health and good spirits.

Cordially

Harry Schwartz

*It doesn't really matter
all that much, though
I should.*

*There is a fair chance, but a
small cloud over it, that I can
lunch with you on 11/15. Please call my office
497-5801 that a.m. - I hope it can work out.
Why not visit us also on 11/14 : "dedication
of our Severus System." -*

John
